

# LATAM LITHIUM

TSX-V: LALI | OTCQB: PFFOF | FSE: POTA

A Canadian-based company dedicated to the  
Acquisition, Exploration, and Development of  
projects in Argentina's Lithium Triangle

---

May 2026

# FORWARD-LOOKING STATEMENT

This presentation contains forward looking statements concerning future operations of LatAm Lithium Corp. (the “Company”). All forward-looking statements concerning the Company’s future plans and operations, including management’s assessment of the Company’s project expectations or beliefs may be subject to certain assumptions, risks and uncertainties beyond the Company’s control. Investors are cautioned that any such statements are not guarantees of future performance and that actual performance and exploration and financial results may differ materially from any estimates or projections. Such statements include, among others: possible variations in mineralization, grade or recovery rates; actual results of current exploration activities; actual results of reclamation activities; conclusions of future economic evaluations; changes in project parameters as plans continue to be refined; failure of equipment or processes to operate as anticipated; accidents and other risks of the mining industry; delays and other risks related to construction activities and operations; timing and receipt of regulatory approvals of operations; the ability of the Company and other relevant parties to satisfy regulatory requirements; the availability of financing for proposed transactions, programs and working capital requirements on reasonable terms; the ability of third party service providers to deliver services on reasonable terms and in a timely manner; market conditions and general business, economic, competitive, political and social conditions. It is important to note that the information provided in this presentation is preliminary in nature. There is no certainty that a potential mine will be realized.

Technical content has been reviewed and approved by Mr. Mike Kilbourne, P.Geo., who is a Qualified Person as defined by National Instrument 43-101, Standards of Disclosure for Mineral Projects.

# INVESTMENT HIGHLIGHTS

Strategic Asset in Argentina's Lithium Hotspot

## ARGENTINE LITHIUM PROJECT

## CANADIAN ASSETS

### STRONG MANAGEMENT

Leadership teams in both [Canada](#) and [Argentina](#) with [significant experience](#) in the resource sector

### SURGING DEMAND

The "[Green Revolution](#)" is boosting [EV demand](#), necessitating new sources of Lithium and other battery metals. Annual global electric vehicle sales are forecasted to reach [24.4 million](#) by 2030

## YERGO

### 100% Ownership

LatAm Lithium's flagship project is the centrally-located 2,932 Ha drill-ready Yergo Lithium Project in Catamarca Province, Argentina

### Strategic Asset & Complete Control

Yergo encompasses the entire Aparejos Salar, has demonstrated promising lithium concentrations, and a large at surface lithium-brine bearing aquifer

### Proximity to Success

Located 9km from the Tres Quebradas Project, developed by NeoLithium, acquired by Zijin in 2022 for C\$960 million

## GOLD

Northwestern Ontario:  
Renowned for gold- rich districts

Red Lake: South of Otter project 8km from the Great Bear Project, acquired by Kinross in 2022 for \$1.8 Billion

Thunder Bay: Gold Creek project in proximity to historic mines

# LITHIUM DEMAND

The scale of today's lithium supply dwarfs in comparison to what is needed in the coming decade, as the world will require **300TWh** of batteries by 2050

# GROWING MARKET

Annual global electric vehicle sales are forecast to reach **24.4 million by 2030**

Source: Bloomberg 2021

# YERGO LITHIUM PROJECT

Catamarca Province, Argentina

## HIGH QUALITY LITHIUM BRINE

Sampling by LatAm Lithium returned values of up to 373 mg/L Lithium and up to 8,001 mg/L Potassium including low Magnesium to Lithium ratios.

## FULLY OWNED SALAR

The claim encompasses 2,932 Ha drill-ready & fully owned Salar and is located approx. 9km southeast of Zijin Mining's Tres Quebradas Salar project ("3Q").

## SHARED GEOLOGY WITH 3Q

Due to the Yergo Project's proximity to the Zijin's 3Q Project, both likely possess similar evaporitic climates and geologies, including exposure to lithium source rocks. Thus, Yergo is presumably rich in Lithium & Potassium.

### NEXT STEPS

- Finalize Acquisition: LatAm Lithium Successfully Acquired 100% Ownership of Yergo Lithium Project Through Option Buyout in September 2023
- Expand Exploration: Initiate drilling to validate Yergo's potential for significant lithium grades
- Strategic Positioning: Leverage Yergo's promising features and proximity to the Tres Quebradas Project to attract potential stakeholders and partnerships

# CANADIAN GOLD PROPERTIES

## Northwestern Ontario Gold Projects

### RED LAKE, ONTARIO

Northwestern Ontario is home to several world class mineral districts with major deposits and mines including gold and silver, as well as a diverse portfolio of metals such as nickel, copper, zinc, platinum and palladium, cobalt and iron.

The gold district of Red Lake, Ontario is recognized as a high-grade mining camp.

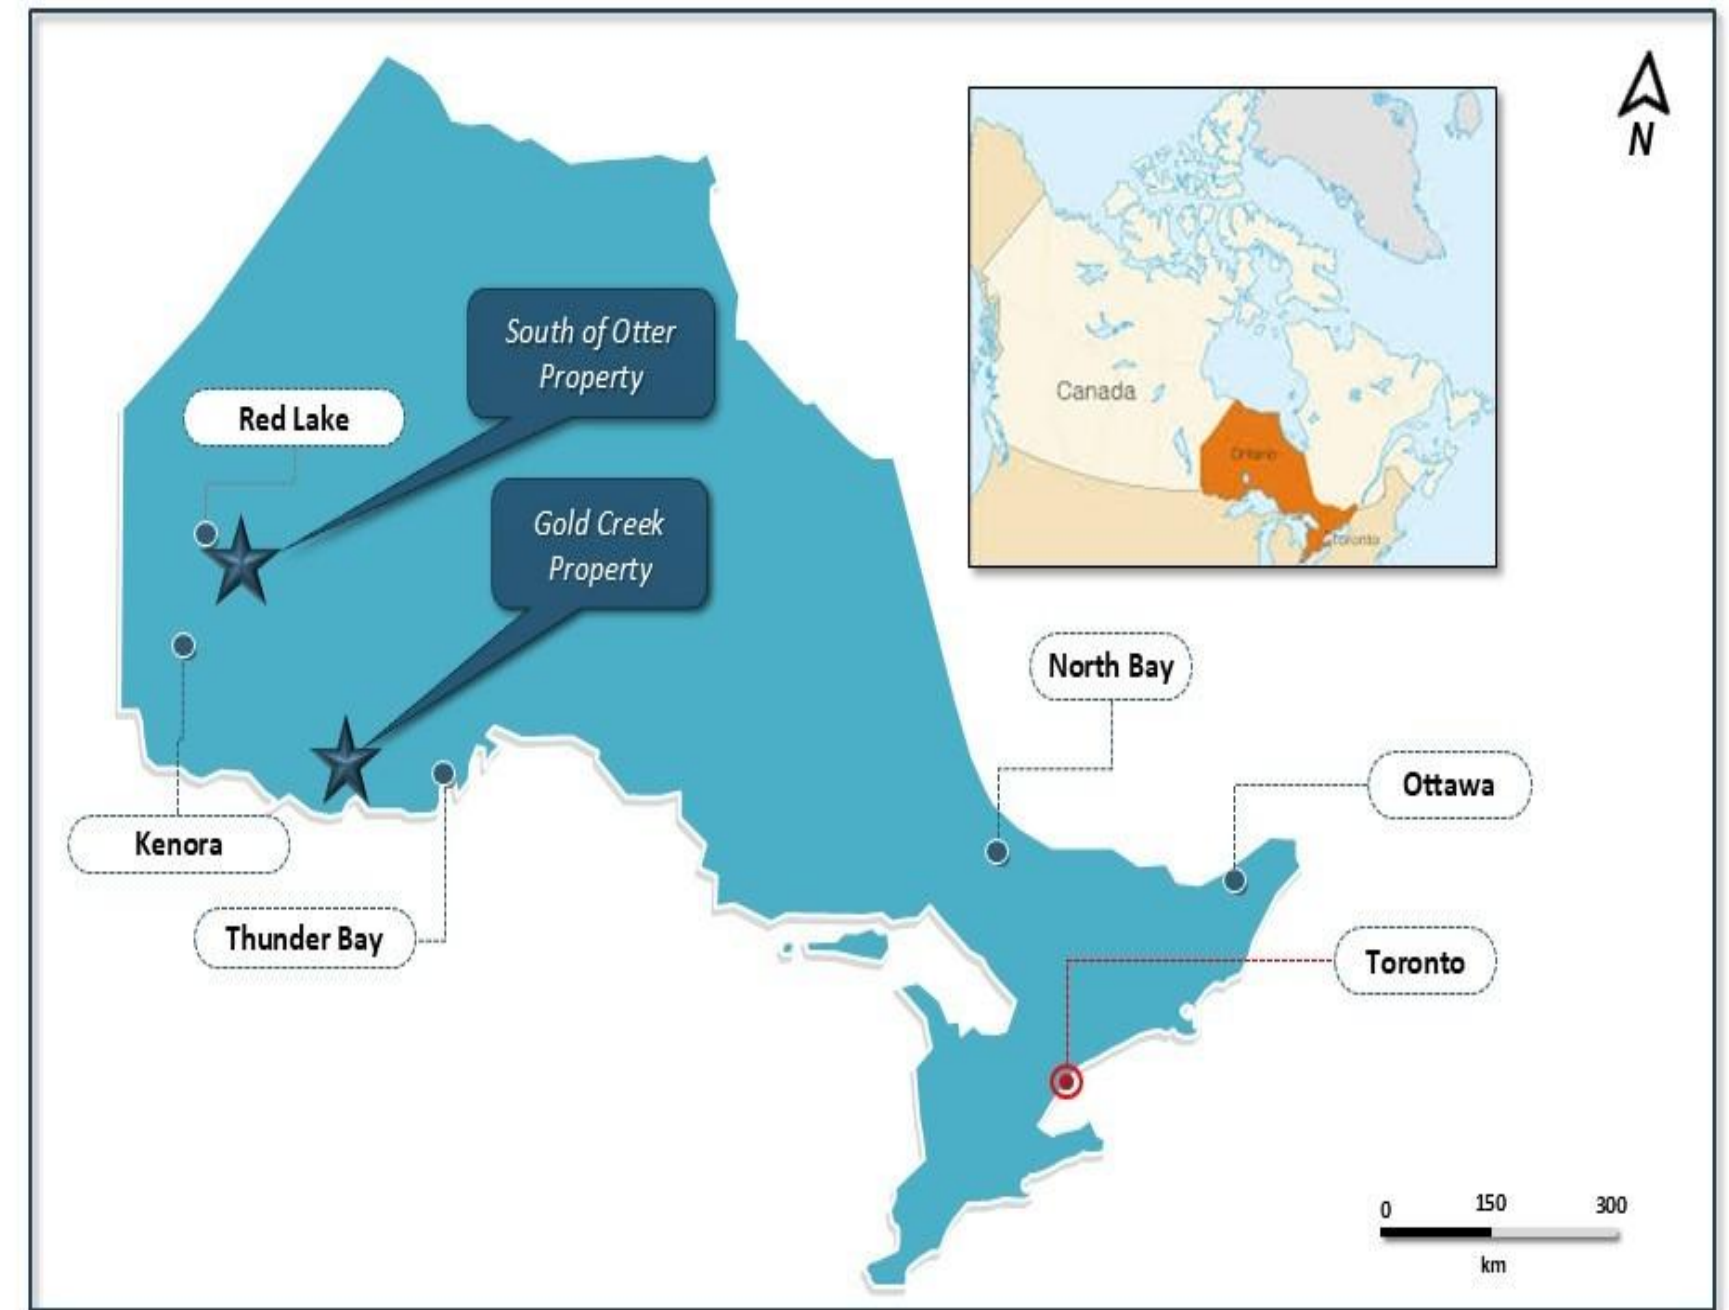

#### South of Otter Property

LatAm Lithium’s SOUTH OF OTTER project is strategically located in the Red Lake mining district and has nearby infrastructure and road access. It is in close proximity to the high-grade Great Bear gold project acquired by Kinross Gold Corp. in 2022 for CA\$1.8 billion from Great Bear Resources Ltd.

#### Gold Creek, (Thunder Bay) Property

The GOLD CREEK property covers approximately 4,036 hectares. Historical work includes multi-ounce gold grab samples, as well as drill intercepts of 4.32 g/t gold over 41 metres and 4.36 g/t gold over 20.42 metres and a one tonne bulk sample returning an average grade of 9.9 g/t gold. In June 2024, LatAm Lithium optioned the property to Delta Resources Limited in exchange for a combination of shares and cash. Delta is actively exploring the area.

## Regional Location

## SOUTH OF OTTER: RED LAKE, ONTARIO

The South of Otter Property comprises 173 mining claims and covers approximately 3,633 hectares.

The Property is strategically located just east of Ontario Highway 106 and is serviced by active logging roads with nearby power and natural gas lines.

The claims are contained within the Birch-Uchi-Confederation Lakes greenstone belt which hosts the world-renowned Red Lake high-grade gold mines just 35km north-west of the Property.

The boundary of Kinross's (Great Bear) project, currently being drilled, is only 9km west of the South of Otter. The two properties share similar geology and structures.

Sampling, trenching and airborne geophysics by LatAm Lithium have resulted in geophysical anomalies coinciding with gold-in-soils chemical anomalies.

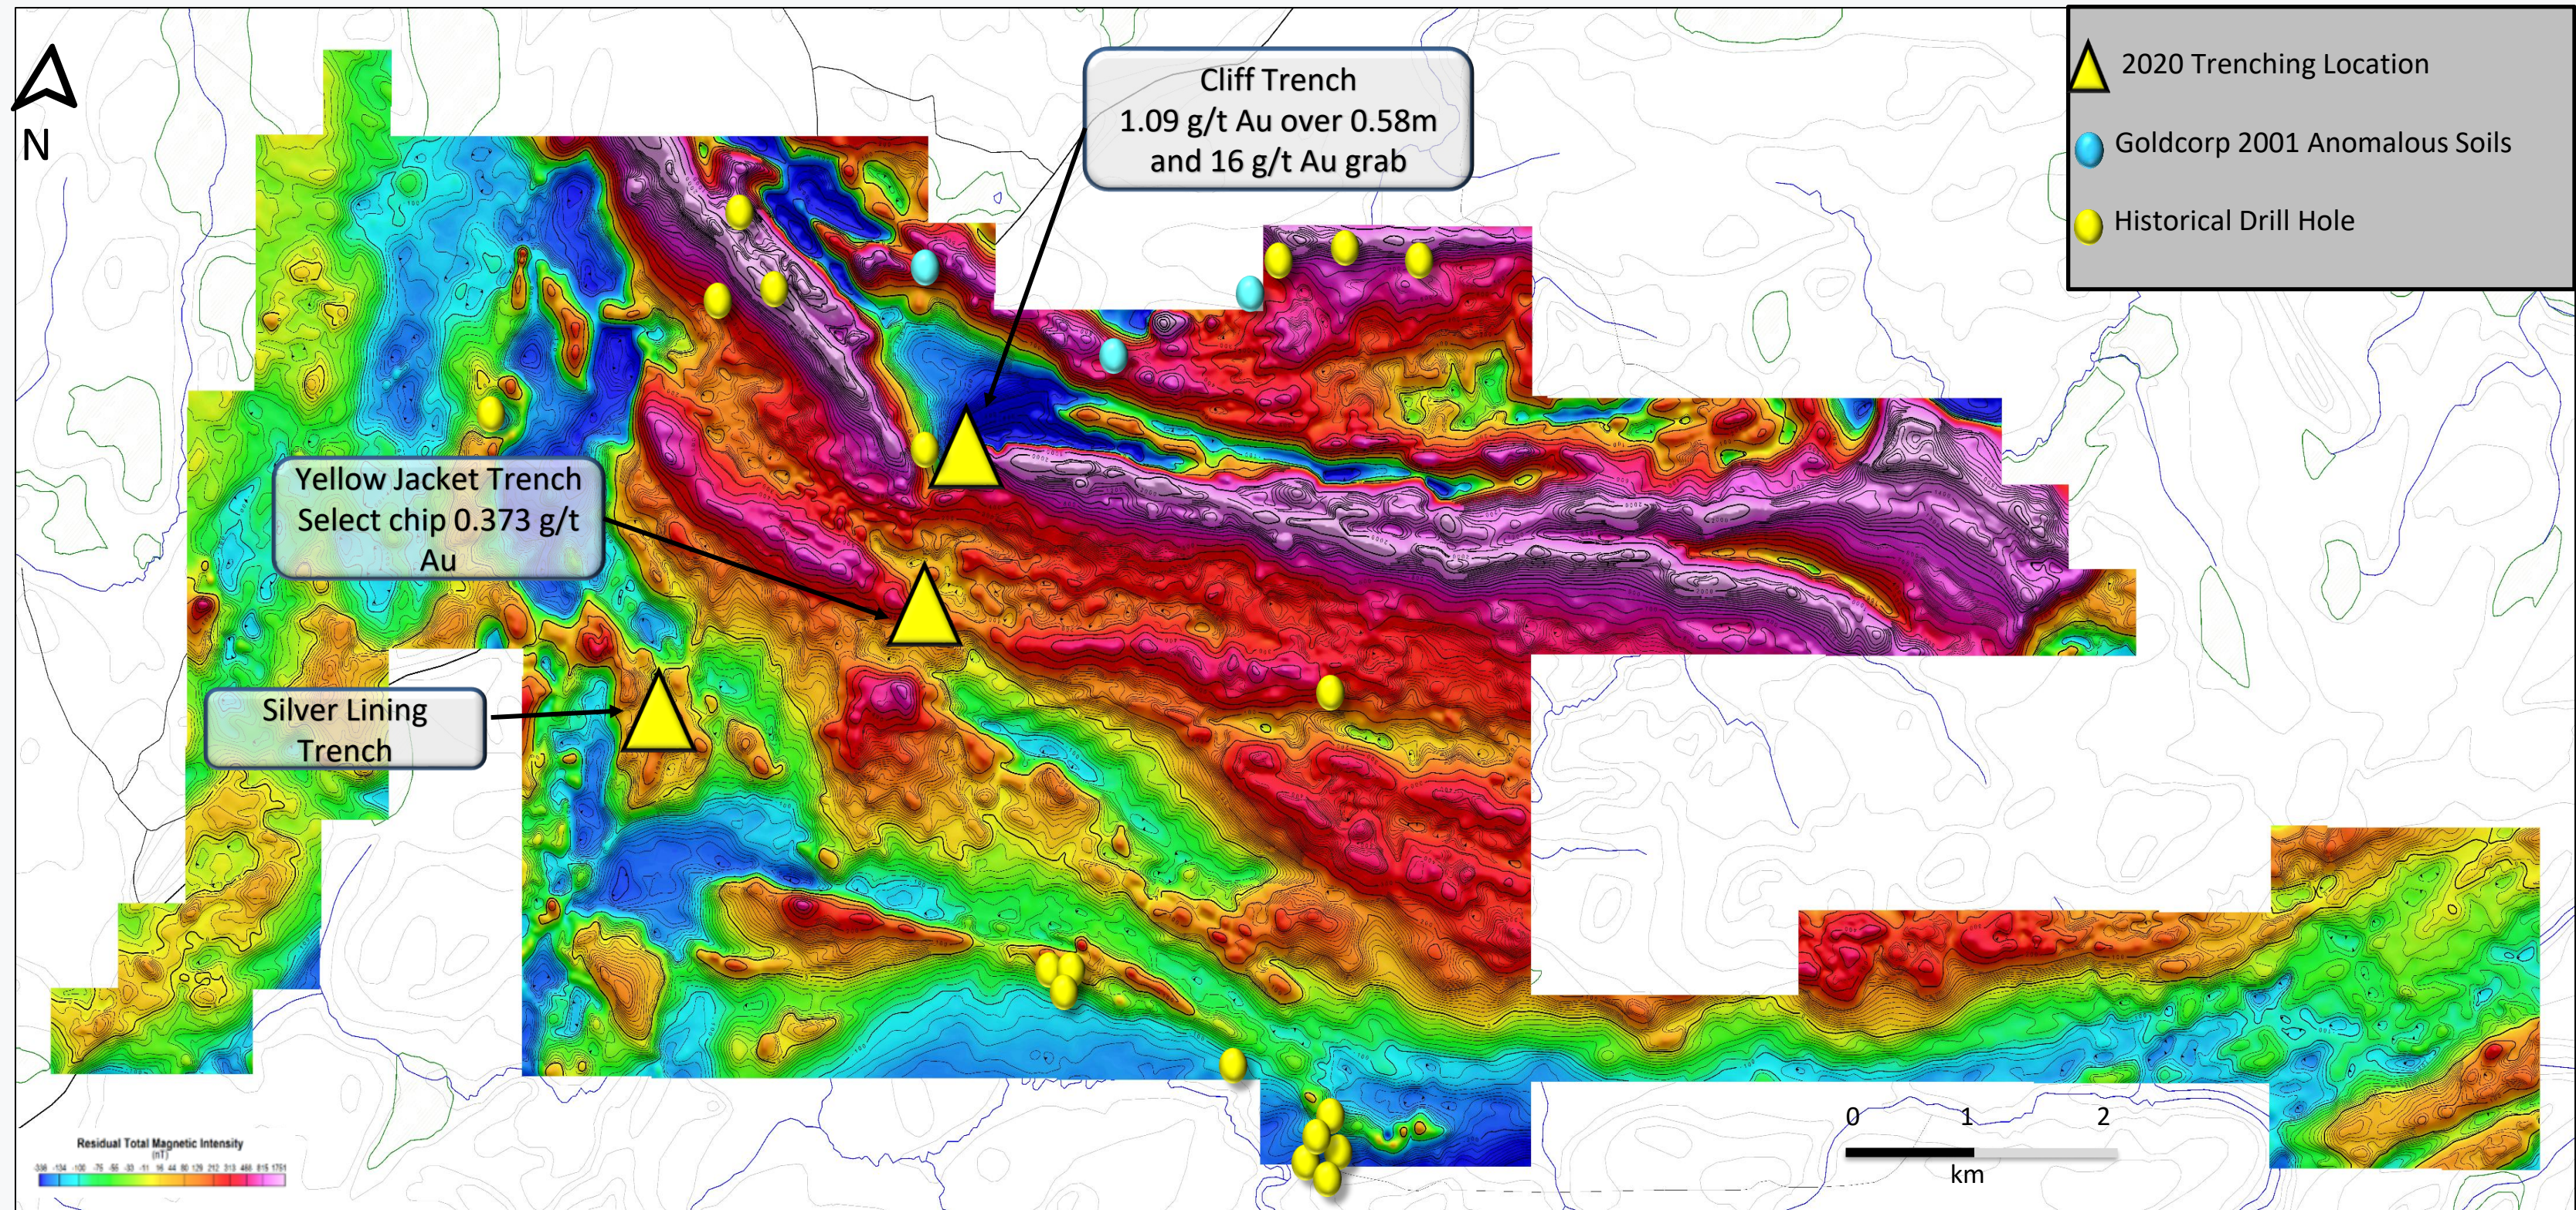

The South of Otter area is known for its copper and zinc volcanogenic massive sulphide ("VMS") potential, but LatAm Lithium's results as well as the recent success of Kinross's Great Bear project, has opened the possibility for significant gold mineralization.

# SOUTH OF OTTER: LOCATION

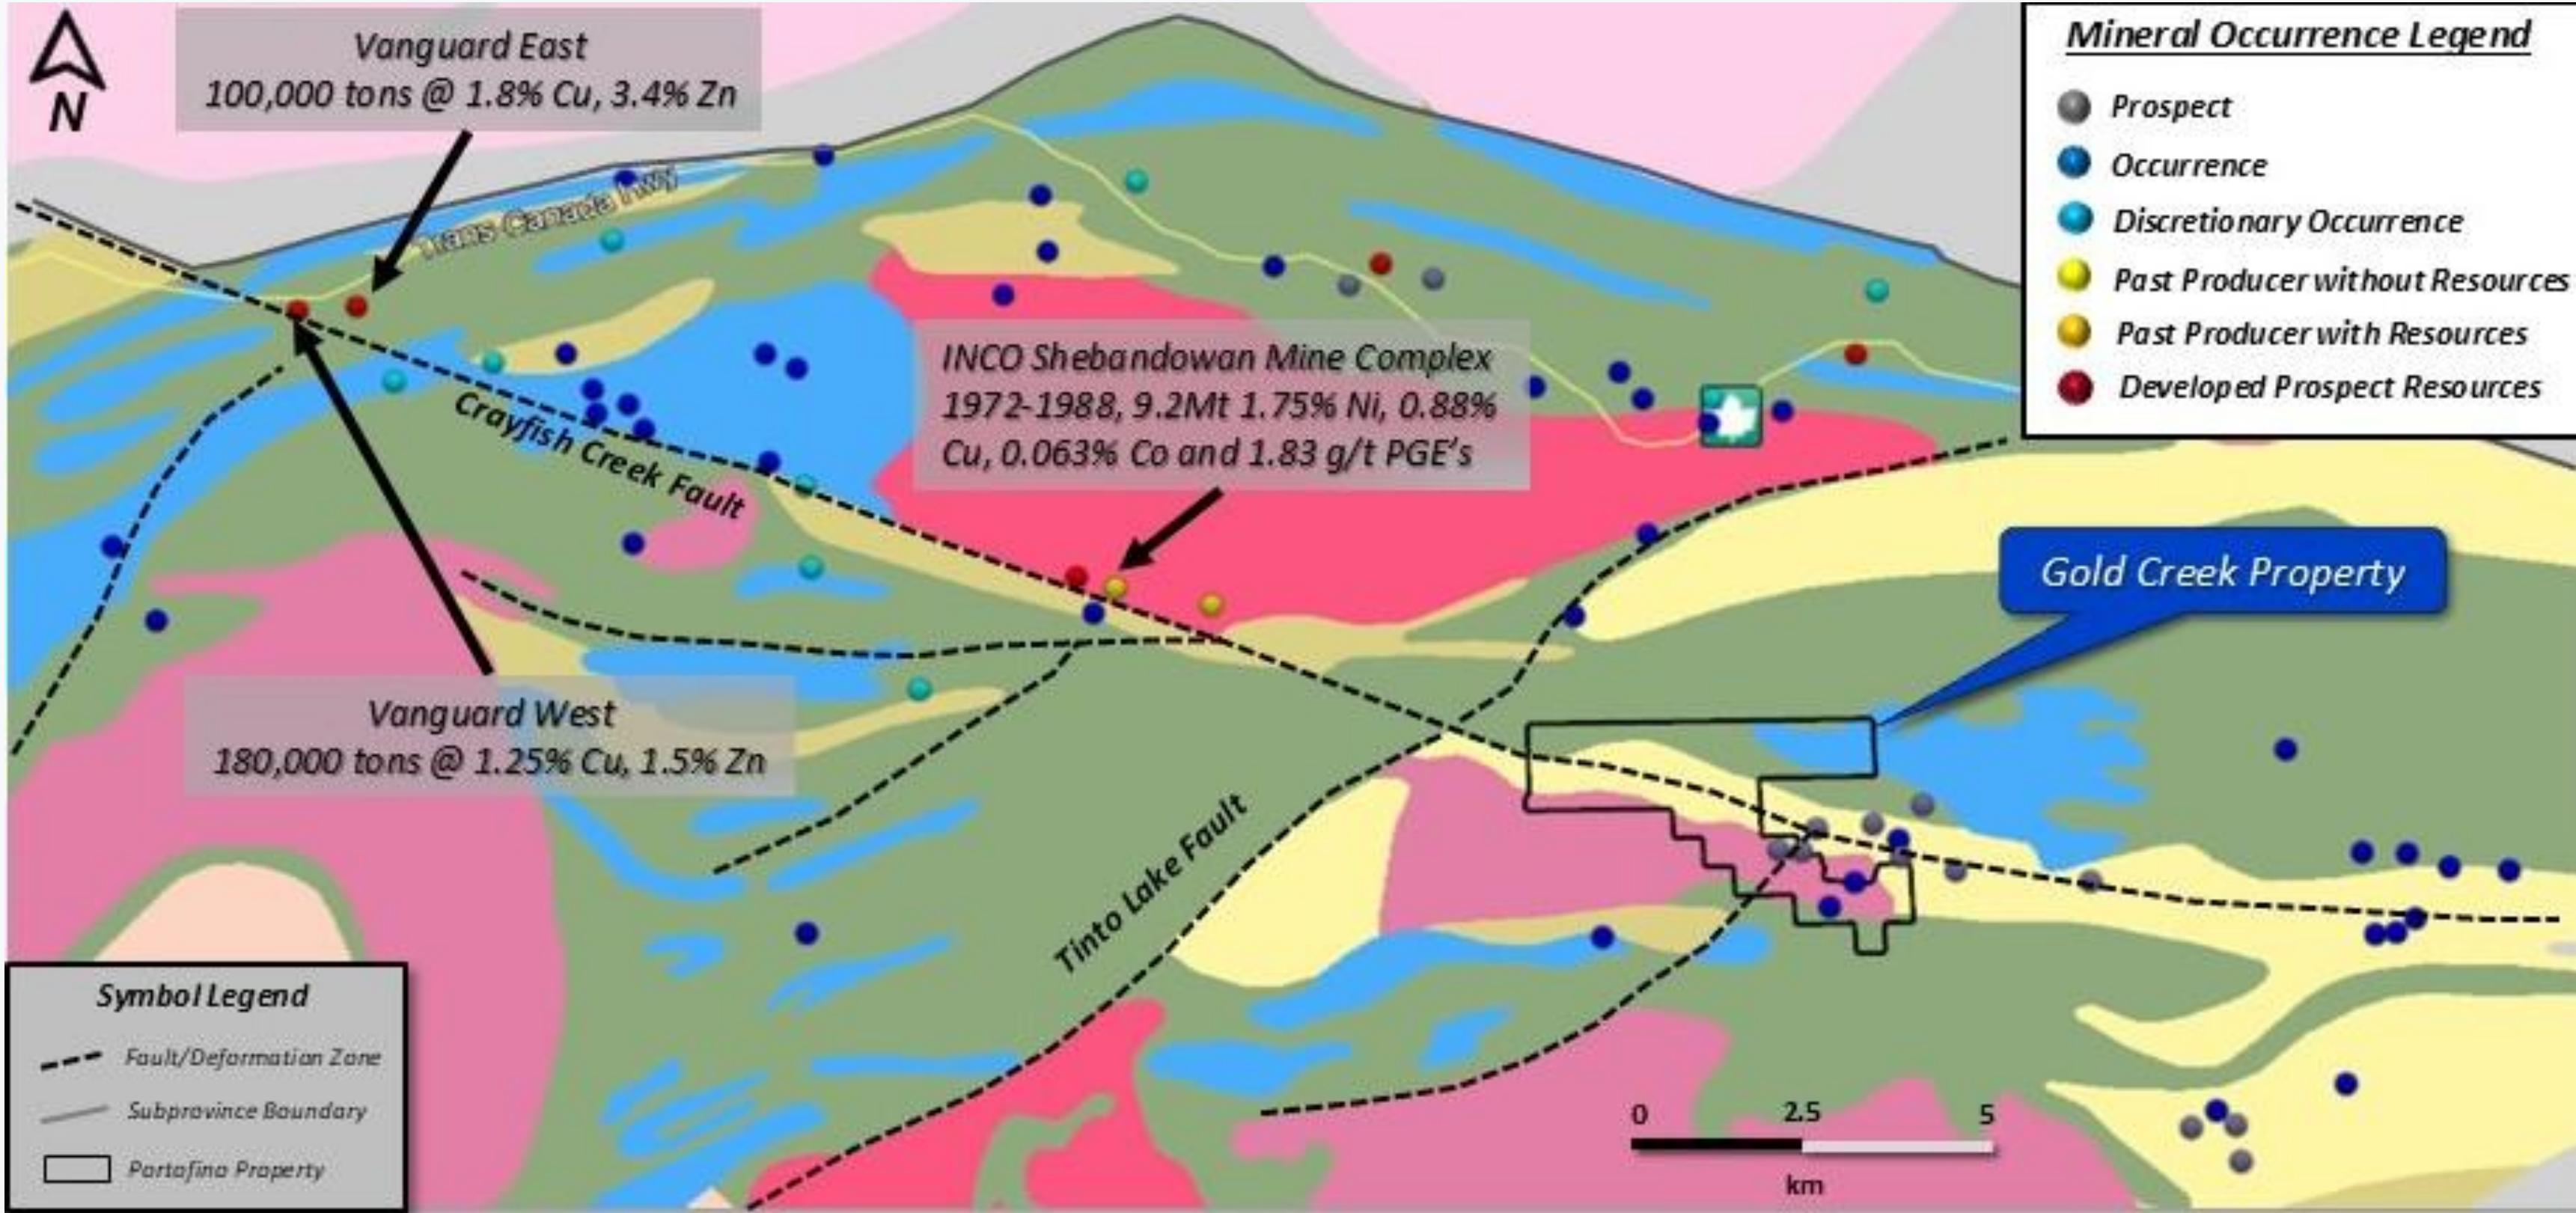

# SOUTH OF OTTER: HIGH RES AIRBORNE MAG SURVEY RESULTS

✓ In August 2020, LatAm Lithium completed a high resolution heliborne magnetic survey of the entire property. This aided in associating recent positive trenching results and gold-in-soil anomalies with distinct magnetic features.

# GOLD CREEK: MINERAL OCCURRENCES AND DEPOSITS

# LEADERSHIP

**Rodney Campbell**  
CEO

Previously worked as a Financial Advisor at BMO Nesbitt Burns, where he developed strong client relationships and gained extensive knowledge of the finance industry.

In addition to his financial background, he spent 17 years in the Oil and Gas sector, overseeing procurement and the development of fuel business operations for major industry leaders, including Encana, Apache Corporation, Canadian Hunter Exploration, Elbow River Resources, ERS, and MP Energy.

**Jeremy Wright, CPA, CMA**  
CFO & Director

20+ years as CEO of Seatrend Strategy Inc.

Directorships and CFO roles at companies like Avant Brands (TSX: AVNT), Centurion Minerals (TSX-V: CTN), and Westmount Minerals (TSX-V: WMC)

Senior role at Deloitte LLP for six years.

Expertise in corporate finance, risk management, and governance in sectors such as life sciences and mining.

Chartered Professional Accountant (CMA) with a BA (Economics) from Brock University.

**Brian Crawford, CPA, MA**  
Director

B. Com. from the University of Toronto.

Extensive role as a senior financial executive with both public and private entities and as a partner in a national firm of chartered professional accountants.

Currently serves in key roles such as Director, Corporate Secretary, and/or Chief Financial Officer for several TSX-V and CSE listed companies.

Affiliated with companies like Colibri Resource Corporation, Searchlight Resources Inc., CBLT Inc., and Tempus Capital Inc.

**Stephen Wilkinson**  
Director

Vancouver-based mining analyst for RBC Dominion Securities Inc. during the mid-late 1990s.

President, CEO, and director of Northern Orion Explorations Ltd. from 1999 to 2002. Also founded and funded various private and public exploration companies.

Former CEO and founder of Blue Star Gold Corp.

Holds a BSc (Geology, 1976) from University of Western Ontario, a Master of Science (Geology, 1983) from Carleton University, and an MBA from Clarkson University (1995).
